

10 X 10 GREENHOUSE

Parts:

- 18 5' Galvanized Pipe
- 4 4' 11" Galvanized Pipe
- 6 3 Way Corners
- 3 4 Way Corners
- 4 Single Pipe Clamps with Bolts
- 2 Double Pipe Clamps with Bolts
- 1 Greenhouse Cover
- 19 White Ball Bungees
- 6 6" Metal Feet with Thumb Screw

Instructions:

1. Arrange all 5' pipe and fittings on the ground as seen in figure 1.
2. Insert pipe and fittings until frame fits tight and secure.
3. Tarp installation-----Before installing cover, unzip the door on the cover. This will make installation easy and will not cause damage to zippers. Place tarp over frame so that the door is located at front of the frame and the window at the rear. Leave the sides of the cover on top of the frame until the legs are installed.
4. Lift one side of canopy top and insert legs. Proceed to the other side.
5. Pull sides of tarp down and adjust until it fits equally on all sides.
6. Attach sidewall pipe (4' 11") to legs as seen in figure 2. Using the single clamps on the corners and the double clamps in the middle.
7. Place bungees through grommets and around sidewall pipe as seen in figure 3. Sidewall pipe should then be pulled down until the cover is pulled tight. Then the clamps may be tightened.
